

CRIMINAL LIVE SCAN SOFTWARE

■ What makes us unique?

Based in San Antonio, Texas, we're committed to keeping our products in-step with law enforcement requirements so that you never need to worry about falling behind. As law enforcement serves around-the-clock to protect U.S. citizens and property, we want to ensure you are equipped with the best solutions to do your jobs efficiently. We have a 15-year history building biometric software that lowers your total cost of ownership.

Your law enforcement agency wants to expedite your criminal booking process and you are considering what kind of live scan software is a fit for you. You may be considering how to:

- Create and manage high quality biometric records through a repeatable and reliable process
- Replace a legacy system
- Increase effectiveness of law enforcement resources by requiring minimal operator training or proficiency

These may be some of your day to day considerations:

- Increase the capabilities and speed of Ten-Print and Palm-Print capture
- Provide your officers with better tools they want to use
- Capture more than finger and palm prints – scars, marks, tattoos, mugshots, signatures, and iris images
- Integrate with local RMS/JMS and AFIS

Fulcrum Biometrics can help. The **FbF® LiveScan** software solution was built by biometrics experts to provide the out-of-the-box tool and the extensibility to tackle the criminal booking process with ease.

Managing your live scan
booking process is easy!
...*when* you have the right
solution in place.

AGENCY NEEDS AND CHALLENGES

- Error reduction in the booking process
- Cost savings is evident in annual support costs, integration costs, volume discounts, tax exemption and more

USER NEEDS AND CHALLENGES

- Simple interface prompts the operator through the steps of capturing fingerprint slabs and rolls
- On-screen visualization of finger image quality scoring speeds the process
- Easy to use graphical interface requires minimal training
- Touch-screen functionality (option) speeds input
- Quality check and sequence check are automatic

I.T. NEEDS AND CHALLENGES

- Ready to implement (out of the box) features allowed by FBI Next Generation Identification (NGI) standards for live scan
- Certified with both 10-print and palm scanners
- Supports electronic submissions (SMTP, FTP)
- The print-to-card functionality is built in (license required)
- Fulcrum's expert maintenance and support staff are based in Texas
- Large capacity storage of transactions

THE FULCRUM BIOMETRICS TEAM IS HERE TO HELP!

If you have any questions regarding FbF LiveScan or how our products can improve your agency, our passionate team is here for you.
