THE GATEKEEPER

The GateKeeper™ is a true "In Motion" AI based Facial Recognition platform. The GateKeeper™ is scalable and interoperable, implementing dual platform cross verification technologies that allow for surveillance and physical access control solutions to perform as a unified platform.

The GateKeeper™ allows for easy management and monitoring of access to doors, turnstiles, speed gates or any entry point using a seamless fusion of various biometric technologies creating a true multi-factor biometric authentication platform using Face, Fingerprint, Iris and touchless Palm Vein authentication

Ideal for any vertical, the GateKeeper will do as it is named, keep your gate safe; whether a border crossing, building entrance, military base, Bank or hospital, The Gate keeper will monitor in real time and manage your site for you.

FEATURES THAT MAKE A DIFFERENCE

Ultra - fast GPU powered backend face recognition platform with extremely low latency

Up to 1M faces database

Recognition in real - time

Multiple matching engines available

Full face masks support, no need for an additional enrollment.
